With a system consisting of over 90 autonomous dealers, the lift truck group provides quality materials handling equipment to the comprehensive North American market. Doosan Infracore America Forklift sellers successfully operate in over 220 service and product sales places all through Canada and the U.S. The lift truck product line remarkably features 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these numerous truck designs range from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest expanding lift truck business in the North American market, thanks to their reliability in retaining a high degree of consumer service excellence and optimum product performance to all Doosan Infracore Forklift users. The U.S. forklift division located in Cleveland has a professional team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the home-based forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled lift trucks as part of a home-based equipment expansion venture. Sales of these goods were originally targeted to state-run corporations, large scale corporations, and the armed forces. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Domestic lift truck trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's progressive technological advancements combined with sales success placed them in a situation of significant growth of their forklift operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to counter act competitive pressures in the US materials handling industry. This venture radically expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a contemporary plant which helped set up the company for the fabrication of high end added-value goods suitable for export. In 1993, the corporation had a global sales system and started exporting models they had developed through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas marketplaces.
