

## JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove set out on a cross country RV expedition. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

While on their trip, John spent time conversing with former business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a vast market for a product that could swiftly and securely elevate individuals in the air to accomplish upkeep and other building services.

After their return from holiday, John set up a business with two of his friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the simple design essentials of that original lift into current designs.

JLG lift trucks have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the business proudly continues to expand itself into different markets globally and develops new products to make certain clients are capable of being more effective and perform in the workplace within a safer atmosphere.
