

## Meritor Part

Meritor Parts - The Meritor Business is a leading international dealer founded upon 100 years of tradition of quality and service. Meritor specializes in integrated systems with different modules and parts to the original machinery manufacturers and aftermarket equipment within the transportation and industrial sectors.

Meritor prides itself in the company's distinctive energy and thinks that this energy contributes to their competitive advantage within the worldwide operations. The business values all their clients and wants to guarantee their success while anticipating their various needs. Meritor begins with a philosophy that values diversity of people and their broad thought processes. Operating in 19 nations and hiring over 11,200 people, Meritor promotes innovation and collaboration among a team of experienced experts.

By only employing future focused workers, Meritor strongly feels these top-caliber people would be able to rapidly adapt to changing environments and demonstrate the performance and commitment needed to be able to attain results in the competitive materials handling trade. The company empowers their teams to make sound business decisions in order to improve the overall success of the business. In return, Meritor offers all of their workers different possibilities for professional and personal development.

The Advanced Engineering team is on the forefront of systems engineering and components. This consists of axles, drivelines, braking and suspension systems meant for medium and heavy duty trucks, military vehicles, trailers, off-highway vehicles and buses. The Meritor Advanced Engineering team is developing. They started a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives that represent the whole Asia Pacific region. This particular team is even responsible for supporting the needs of all their global engineering personnel.

Meritor's dynamic and customer focused Quality team is committed to ensuring optimum processing at their aftermarket distribution facilities and production plants which are situated all over the globe in 19 nations and in 5 different continents.

The supplier development network is specially located to be able to support new business development. Regional teams are supported by international centralized specialties, initiatives and quality systems in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program encourages a fact-based, data-driven method to decision making in each part of the business. The DFSS or Design for Six Sigma ensures product reliability within each region. The team is even included transactional Green Belts who use Six Sigma tools to business processes and implement lean methods.
